

SURAFEL YIMAM KEBEDE

AI Engineer | Senior Full-Stack Engineer | Startup CTO experience

Addis Ababa, Ethiopia (remote, UTC+3) | +251 94 551 4370 | workwithsurafel@gmail.com

surafel.work | github.com/surafelx | linkedin.com/in/surafelykebede

SUMMARY

Full-stack engineer with 9+ years of shipping web products, now focused on AI agent systems that run in production. I own products end to end: React and Next.js front ends, Node and Python back ends, PostgreSQL and MongoDB, LLM tooling (Claude, OpenAI, LangGraph, MCP), Docker and CI/CD. I co-founded an AI agents company, led engineering as CTO at two startups, and delivered 20+ five-star freelance projects. I prototype fast with AI-assisted tooling, then do the hardening (auth, tests, observability, deploys) that makes it production-ready. Every project below marked *Live* can be opened and tested today.

CORE SKILLS

AI and agents: multi-agent orchestration, LangGraph, LangChain, MCP servers, Claude / OpenAI / OpenRouter APIs, RAG and vector databases, prompt and tool design, evaluation, n8n and Playwright automation

Backend: Node.js (Express), Python (FastAPI, Django), TypeScript, REST and GraphQL, WebSockets, PostgreSQL, MongoDB, Redis, BullMQ, Prisma, Supabase, Apache Airflow, Snowflake

Frontend: React, Next.js, TypeScript, Tailwind CSS, shadcn/Radix, Material UI, Three.js / React Three Fiber

Infrastructure and tooling: Docker, GitHub Actions CI/CD, AWS (EC2, S3, RDS, Lambda), Vercel, Linux; Stripe, Telegram Bot API, GoHighLevel, Jest, TDD

EXPERIENCE

Vision Infrastructure Group Services — Chief Agent Officer (Lead AI Engineer)

Mar 2026 – Present

Sydney, Australia (remote)

- Own AI agent strategy and delivery for the company and its clients: scope agentic workflows, select models and tooling, and ship them into production.
- Build LLM-powered features end to end, from prompt and tool design through backend integration, evaluation and monitoring.

Homewise — AI and SDR Automation Engineer (contract)

2026 – Present

North Carolina, United States (remote)

- Build AI-driven sales-development (SDR) automation: lead sourcing and enrichment, LLM qualification, personalised outreach sequences and CRM sync, so reps only touch warm conversations.
- Own the automation stack end to end: prompts and guardrails, scheduling and queues, CRM and email/SMS integrations, and reporting on reply and booking rates.

Celerus.io — Co-Founder

Aug 2024 – Present

United States and Addis Ababa, AI agents platform

- Co-founded an AI agents company and built Conducting OS, which coordinates five specialised agents (sales, support, analytics, scheduling, reporting) through one orchestration layer. [Live](#).
- Built analytics dashboards, predictive models, job-scraping and candidate-assessment tooling for global clients.

Budera — Chief Technology Officer

Apr 2025 – Sep 2025

Singapore (remote), AI business-partner SaaS

- Took the product from idea to MVP: designed the architecture, set the technical roadmap and led product engineering decisions.
- Designed and shipped Budera AI Legion, five independent orchestrated agents (growth strategy, compliance, trend signals, competitor and operational intelligence) that return structured, scored outputs from a shared company profile. [Live](#).

Nibret — CTO / Lead Engineer

Jun 2024 – Aug 2025

Addis Ababa, real-estate SaaS

- Architected and built a property platform for the Ethiopian market: listings, search and filters, CRM with lead tracking, admin dashboard, analytics and English/Amharic support. React, TypeScript, Supabase, Node API. [Live](#).
- Built authentication, payments, notifications and transaction-workflow APIs for web and mobile clients.

Coderz — Product Manager

Nov 2024 – Jan 2025

- Ran product management for a US coding-education product, from roadmap through delivery.

Empire Business — Senior Web Developer

Oct 2024 – Jan 2025

United States (remote)

- Built sales funnels and CRM automation on GoHighLevel, third-party API integrations and insight dashboards that improved client lead conversion.

AgriSun Ethiopia — Technology Lead

Jan 2023 – Sep 2024

Addis Ababa, solar-powered agriculture

- Built software for solar-powered agriculture and inverter technology, including IoT integration that feeds sensor and energy data into central monitoring dashboards.
- Built the company's websites, the Agri-Sun Stock Smart inventory system and analytics dashboards: React/TypeScript front ends, Node/Express/MongoDB APIs. [Live](#).

Mind Learning — Full-Stack Engineer and Bootcamp Lead

Nov 2023 – Aug 2024

- Built the learning platform and summer-camp site (Next.js, Node), and designed and taught a coding bootcamp across several cohorts.

Independent Contractor — Data and Software Engineer

2022 – 2024

Enterprise clients under NDA (remote)

- Built ETL pipelines on Apache Airflow with Snowflake warehousing: ingestion, transformation, storage and analytics modules.

ITIO — Full-Stack Engineer

Jun 2020 – Sep 2023

California, United States (remote)

- Built a website-testing tool (analytics, error reporting, cross-browser checks), a social platform, and a solar-power monitoring system with real-time visualisation. Node.js, React, MongoDB, test-driven development.

Upwork — Freelance Full-Stack Developer

2019 – 2020

- Delivered 20+ web, API and integration projects with 5-star client feedback; MVPs in React, Node.js and Python.

Earlier: Software Engineer, SolarVillage (2018 – 2019): monitoring and data-collection tools for energy and farming projects with hardware integration. Software Engineer, DykeSoft (2016 – 2018): desktop ERP, inventory and rental systems for multi-branch companies, plus client training and documentation.

SELECTED PROJECTS

Apleo — AI opportunity-discovery SaaS (2026) · [Live](#)

Next.js 15, React 19, TypeScript, MongoDB/Prisma, Claude API, Stripe, NextAuth

- Finds scholarships, jobs and grants across 190+ countries and uses Claude to draft tailored applications and analyse documents. Three-tier subscription (free / \$19 / \$49) with Stripe billing, RBAC, audit logs and rate limiting.

Pipe — automation control room and opportunity engine (2026) · demo on request

Node.js, TypeScript, Next.js, Playwright, BullMQ, Redis, MongoDB, Telegram Bot API

- Scheduled workers (scrape every 6h, extract every 15m, publish every 2h) feed a live Telegram channel. Rule-based extraction with an optional LLM path runs at zero AI cost by default. The dashboard reports outcomes across cron and custom jobs, not just executions.

Ethiopian Coffee Guide and Ethiopian Medical Hub — B2B marketplaces · [Coffee Guide](#) · [Medical Hub](#)

Next.js, PostgreSQL, Prisma, Stripe, email automation

- Product vision, revenue model and platform build for two marketplaces: one connecting international specialty-coffee roasters with verified Ethiopian exporters, one connecting Ethiopian healthcare suppliers, engineers and tenders with buyers.

Kebele Zero — 3D immersive community platform · [Live](#) · [Code](#)

React, TypeScript, Three.js / React Three Fiber, Supabase, GSAP

- Events, marketplace, radio, media gallery, forum and games in a retro 3D world, with Supabase auth and role-based admin.

EDUCATION AND ACHIEVEMENTS

BSc Biomedical Engineering, Cum Laude (GPA 3.6) — University of Gondar, 2023

1st place, Chapa Hackathon 2024 — national fintech hackathon run by Ethiopia's leading payment gateway

Languages: English (professional), Amharic (native). 120+ public repositories on GitHub. Available for remote roles across US, Australian and European hours.
