

Surafel Yimam

Full-Stack Engineer & AI Systems Builder

workwithsurafel@gmail.com · github.com/surafelx · linkedin.com/in/surafelykebede · Addis Ababa, Ethiopia

SUMMARY

Full-stack engineer building production software — AI agents, full-stack applications, and the integrations that connect everything together. I work across React/Next.js, Node.js, PostgreSQL/Prisma, and the OpenAI API stack. I deploy, I debug, I ship.

I lean into vibe-coding to move fast with AI and prototype in hours — but the real value is in the cleanup: years of experience turning AI-generated or rushed code into something typed, tested, and genuinely production-ready.

SKILLS

Languages	JavaScript, TypeScript, Python, SQL
Frontend	React, Next.js, Tailwind CSS
Backend	Node.js, Next.js API Routes, REST
Data	PostgreSQL, Prisma, MongoDB
AI	OpenAI API, Assistants v2, LangChain, OpenClaw
DevOps	Docker, Vercel, EC2, Git
Approach	Vibe-coding, AI-assisted delivery, code cleanup

EXPERIENCE

Full-Stack & AI Engineer Independent / Freelance · 2022 – Present

- Designed and built multi-agent AI platforms (Celerus.io / Conducting.ai) where specialized agents coordinate through an orchestration layer.
- Built SEO operations automation connecting the SearchAtlas API to OpenClaw — daily digests, alerts, and auto-created tasks for 7 Australian clients.
- Co-built B2B marketplaces for Ethiopian healthcare and specialty-coffee export, including product strategy and revenue models.
- Shipped full-stack products for Australian agencies, Ethiopian startups, and global SaaS companies across web and mobile.
